## Eagle Ford Excellence Award

### Community and Social Investment

*(Two categories: More than 250 employees & Less than 250 employees)*

The Eagle Ford Excellence Award for Community and Social Investment will recognize leading companies, contractors, and non-profits in the Eagle Ford area that are working with communities to make a positive impact.

Successful entries will demonstrate elements of, but are not limited to, the following:

- Corporate or non-profit community engagement showing benefit to the social fabric of the local area
- Providing a benefit to deserving individuals or groups
- Positive impact on the company's reputation in the communities in which it works
- Number of company or non-profit volunteers and/or volunteer hours dedicated to the community

### Environmental Stewardship

*(Two categories: More than 250 employees & Less than 250 employees)*

The Eagle Ford Excellence Award for Environmental Stewardship seeks to honor those who make it their duty to preserve the environment in a responsible manner.

Successful entries will demonstrate elements of, but are not limited to, the following:

- Innovation in reducing environmental impact
- Environmental protection and awareness efforts
- Implementation of practices or use of technology benefitting the environment
- Current, practical applications of the solution, or initiative, within the region
- Long-term, sustainable environmental benefits

### Neighborhood Impression *(One Awardee)*

The STEER Neighborhood Impression Award honors one or multiple organizations that have implemented a community project.

Successful entries will demonstrate elements of, but are not limited to, the following:

- Development of a community project (parks, schools, scholarship program, event, etc...)
- Projects resulting in economic development for the region, short-term and long-term community planning
- Programs to provide necessary training and development for the oil and gas workforce
- Projects supporting the community through public education about the oil and gas industry
- Projects leading to the preservation of the environment

### Innovation in Technology *(One Awardee)*

The STEER Innovation in Technology Award will recognize a leading organization in the Eagle Ford area that has developed a technology that is now being implemented and has led to improvements in any of the following; environmental performance, water utilization, improved safety, cost savings, automation, positive impact in our communities, etc...

Successful entries will demonstrate elements of, but are not limited to, the following:

- Projects resulting in economic development for the region
- Innovation in technology solution to important operational programs
- Preservation of the environment, air quality, water utilization, etc...
- Improving the economic performance of energy development
